EDUCATION

New York University — Tandon School of Engineering

Brooklyn, NY

BSc Business & Technology Management

Sep 2022 - May 2026 (expected)

- Minors: Mathematics, Computer Science | GPA: 3.7/4.0 | Dean's List: Fall 2022 - Present

TECHNICAL SKILLS

- **Languages:** Python, SQL, TypeScript, C++, Java, HTML/CSS
- **Frameworks & DBs:** Next.js, Supabase, PostgreSQL
- **AI/Automation:** Claude API, LLM integration, Workflow Automation, OpenClaw
- **Tools:** Power BI, Excel, PowerPoint, Tableau, HubSpot, Railway, Figma, Adobe Creative Suite

WORK EXPERIENCE

Trunkville

Brooklyn, NY

Technical Lead

Jan 2026 - Present

- Building an internal admin dashboard in Next.js 14 and Supabase with approval workflows, inline editing, duplicate resolution, and live site publishing for trunk show makers and events
- Engineering an automated data pipeline aggregating email and scraper feeds via the Claude API into structured Supabase records, with scheduled jobs and a live monitoring UI

NYU Tandon Department of Computer Science & Engineering

Brooklyn, NY

Teaching Assistant

Aug 2025 - Present

- Guiding 100+ students across two Python introductory courses (CS-UY 1114 & CS-UY 1113), supporting debugging, reinforcing core programming concepts, and managing assignment grading

Strategy & (Part of the PwC Network)

New York City, NY

Summer Associate (Enterprise Strategy & Value — Industrial Products)

June 2025 - Aug 2025

- Supported a 7-member team handling a portion of an aerospace & defense client's post-acquisition transformation engagement, focusing on operations data integration within a unified system
- Consolidated 8 legacy Qlik systems into 2 real-time Power BI dashboards for the Corrective Action Reporting database, improving data transparency and decision speed for engineering and operations teams
- Delivered client-facing presentations, translating complex data into actionable insights for stakeholders

The Triana Group, Inc.

New York City, NY

Growth Strategy Consultant (Healthcare & Industrial Sectors — France)

Dec 2023 - May 2025

- Built executive Tableau dashboards and PowerPoint decks to surface KPIs and support client decisions
- Drove strategic market entry by connecting the CEO of an air ventilation company with 7 physicians at private practices and major hospitals for direct insight into the US. healthcare market
- Mapped North America certification pathway for a robotic sensor client across 3 US regulatory bodies

Flashpoint.ai

Remote

Project Intern

May 2023 - Sep 2023

- Conducted product testing through prompt engineering and prototyped UX designs to enhance the AI
- Built a natural language to PostgreSQL query interface using LLM development via a GitHub repository
- Worked directly with the founding team on product roadmap, feature prioritization, and GTM strategy

LEADERSHIP

NYU Tandon Consulting Club

Brooklyn, NY

Co-President

May 2025 - Present

- Managing operations for a 750+ member organization, including event logistics, partnerships, and finances
- Leading initiatives connecting engineering students with firms, including Capgemini, PwC, West Monroe

PROJECTS

WeatherStyle

- Built an iMessage AI assistant that fetches live weather via the wtr.in API and returns outfit recommendations to your iPhone using OpenClaw and the Anthropic API

Machine Learning: Titanic Survival Classification

- Built a full ML pipeline comparing Logistic Regression, Neural Networks, and SVM on a Titanic dataset using Python, scikit-learn, and pandas to predict passenger survival

Vertically Integrated Project: Sixth Sense

- Contributed to a sensor-based object detection belt for visually impaired users, redesigning the actuator system in Fusion 360 to improve mobility, awareness, and production efficiency
